

Dear Educator,

The Australian Road Safety Foundation is proud to present to you, RoadSet. With support and funding provided by the Australian Federal Government, we have transformed the way road safety education is delivered.

Why is RoadSet essential?

“Road trauma is the biggest killer of Australian children aged between 1 and 14. To change these tragic statistics, we need to address road safety in a new way”.

Aligned with the Australian Curriculum, RoadSet is a precursor to driver safety education and is available **FREE** of charge to all users and takes students on a self-guided learning journey, emphasising on helping them develop their road safety awareness skills across a range of road conditions, environments and scenarios. Aiming to bridge the gap between primary and secondary senior education to continue road safety awareness throughout a student’s schooling career.

Combining original animation with gamified learning interactions to deliver **90 MINUTES** of immersive, engaging content across ten easy-to-digest modules, RoadSet can be effortlessly integrated into the Personal Development, Health and Physical Education learning area or run as a separate wellbeing or road safety education program.

Directed towards Year 9 students, we invite your school to be a part of this **LIFE SAVING** pilot program and implore you to **ACT NOW** and include RoadSet into the schools 2021 teaching activities and educate your students well before they get behind the wheel.

RoadSet and its comprehensive library of educator resources are available for immediate access by visiting www.roadset.com.au.

Join us in empowering our youth by increasing their road safety awareness skills.

For further information, please feel free to contact our RoadSet Team by phoning 1300 723 843 or email us at roadset@arsf.com.au.

Yours sincerely,

Russell White
